16. Fayetteville Country Club golf course charges \$10 to rent golf clubs plus \$30 per hour for golf cart rental. Springdale Country Club golf course charges \$15 to rent clubs plus \$25 per hour to rent a cart.

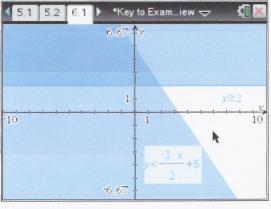

- a) Write an system of linear equations to find the number of hours for which the rental cost is the same. \$3 \times \tau 16 \times y\$
 b) Graph the system.
- b) Graph the system. (25メナルショグ)
 c) For what number of hours is the cost of renting clubs and cart the same for each course?
- d) How much would it cost for that number of hours?

17. Graph the system of inequalities.

$$\begin{cases} y \le -\frac{3}{2}x + 5 \\ y \ge 2 \end{cases}$$

18. Graph the system of inequalities and classify the figure created by the solution

region.

$$\begin{cases} y \le -\frac{4}{3}x + 6 \\ x \ge -1 \\ y \ge -6 \\ x \le 6 \end{cases}$$

Classify the region as a figure.

19. A baker is making pastries. He wants to make at least 48 pans of pastries. The kitchen has two sizes of ovens, one bakes 3 pans at a time and the other bakes 8 pans at a time. The kitchen can use up to 12 ovens at a time. Write a system of inequalities that can be used to determine how many of each type of oven to use.

$$y = 3$$
 PANS AT A TIME
 $x = 8$ PANS AT A TIME
 $x + y \le 12$
 $8x + 3y \ge 48$
 $y \le 12 + 8$
 $y \le 12 + 8$
 $y \ge -8(x-6)$
 $y \ge -8(x-6)$
