

# TI-84 Standardized Test Prep compatible with the ACT

Page	Table of Contents
2	<b>Substitution</b> - Evaluation of algebraic expressions through substitution
3	<b>Solving Linear Equations</b> - Solving Linear Equations in one-variable
4	<b>Functions</b> - Evaluating a Function at a Value
5	<b>Lowest Common Multiple</b> - Basic Operations Using Whole Numbers
6	<b>Modeling</b> - Find the function given a set of data
7	<b>Points</b> - Relations between equations and graphs
8	<b>Matrices</b> - Finding the Determinant of a Matrix
9	<b>Greatest Common Factor</b> - Basic Operations Using Whole Numbers
10	<b>Complex Numbers</b> - Evaluating expressions
11	<b>Decimals</b> - Basic operations with decimals
12	<b>Zeros</b> - Finding roots of polynomials
13	<b>Function Composition</b> - Composing functions
14	<b>Scientific Notation</b> - Calculations involving scientific notation
15	<b>Roots of Polynomials</b> - Finding roots of polynomials
16	<b>f(y) Equations</b> - Relationship between points & lines
17	<b>Logarithms</b> - Evaluating logarithms with base other than 10
18	<b>Circles</b> - Relations between equations and graphs
19	<b>Expanding Binomials</b> - Understanding algebraic operations
20	<b>Exponents</b> - Solving equations with exponents
21	<b>Absolute Value</b> - Evaluating absolute value expressions
22	<b>Inequalities</b> - Solving inequalities
23	<b>Mixed Numbers</b> - Evaluating expressions with mixed numbers
24	<b>Systems</b> - Solving systems of equations
25	<b>Substitution</b> - Using tables to substitute values in expressions
26	<b>Trig Identities</b> - Evaluating trigonometric expressions

**IMPORTANT:** Make sure to update your TI-84 Operating System (OS).  
Update to at least level 2.55 for the steps in this document to work properly

**Elementary Algebra - Substitution**  
 Evaluation of algebraic expressions through substitution

When  $x = 3$  and  $y = 5$ , by how much does the value of  $3x^2 - 2y$  exceed the value of  $2x^2 - 3y$ ?

- F. 4                  G. 14                  H. 16                  J. 20                  K. 50

Type 3 <b>STO</b> <b>X,T,Θ,n</b> to store the value of $x$ . Press <b>ENTER</b> .  Type 5 <b>STO</b> <b>ALPHA</b> <b>1</b> to store the value of $y$ . Press <b>ENTER</b> .	$3 \rightarrow X$  $5 \rightarrow Y$  3  5
Type each expression and press <b>ENTER</b> after each expression to calculate it.	. $3x^2 - 2y$  $2x^2 - 3y$  5  17  3
Subtract these two calculated values.	$3x^2 - 2y$  $2x^2 - 3y$  $17 - 3$  17  3  14

[http://www.actstudent.org/sampletest/math/math\\_01.html](http://www.actstudent.org/sampletest/math/math_01.html)

## Pre-Algebra - Solving Linear Equations

Solving Linear Equations in one-variable

If  $9(x - 9) = -11$ , then  $x = ?$

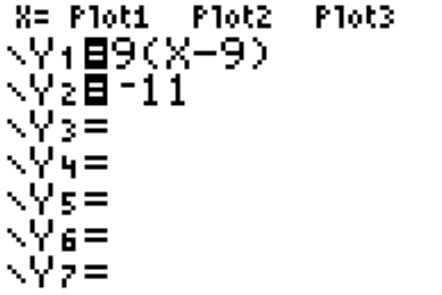

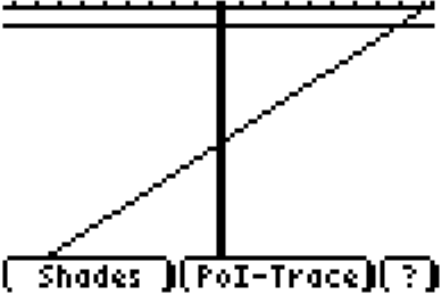

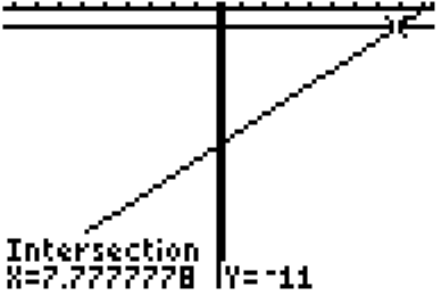

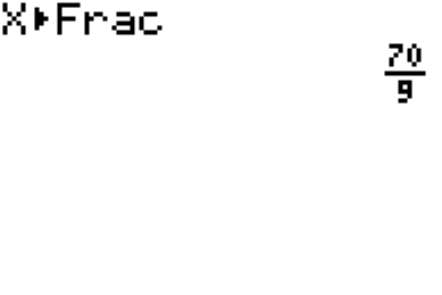

A.  $\frac{-92}{9}$

B.  $\frac{-20}{9}$

C.  $\frac{-11}{9}$

D.  $\frac{-2}{9}$

E.  $\frac{70}{9}$

<p>Press <math>\boxed{Y=}</math> and type the left and right side of the equation as your first two functions.</p>	
<p>Press <math>\boxed{ZOOM}&gt;Fit</math> (to get a better window of the graph).</p>	
<p>Press <math>\boxed{2nd}\boxed{TRACE}\boxed{5}\boxed{ENTER}\boxed{ENTER}\boxed{ENTER}</math> to find the coordinates of the intersection point. The <math>x</math> -value of the intersection point is the solution.</p>	
<p>Press <math>\boxed{2nd}\boxed{MODE}</math> and type <math>\boxed{X,T,\theta,n}</math>. Then press <math>\boxed{MATH}&gt;Frac</math>, to convert the decimal to a fraction.</p>	

<http://media.actstudent.org/documents/preparing.pdf>

## Intermediate Algebra - Functions

### Evaluating a Function at a Value

A function  $f(x)$  is defined as  $f(x) = -8x^2$ . What is  $f(-3)$  ?

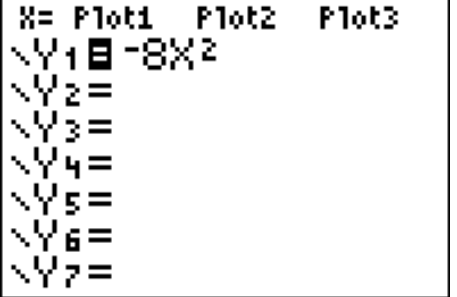

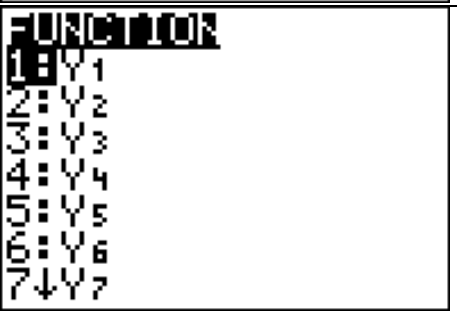

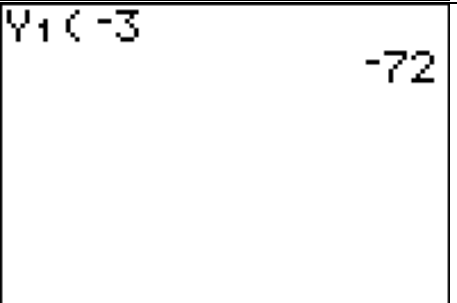

F. -72

G. 72

H. 192

J. -576

K. 576

<p>Press <math>\boxed{Y=}</math> and type the function.</p>	
<p>Press <math>\boxed{2nd}\boxed{MODE}</math> to access a calculator screen.</p> <p>Press <math>\boxed{VARS}\boxed{&gt;Y-Var}\boxed{&gt;Y_1}</math></p>	
<p>Type <math>\boxed{(}\boxed{-}\boxed{3}</math> and press <math>\boxed{ENTER}</math> to calculate the answer.</p>	

<http://media.actstudent.org/documents/preparing.pdf>

Pre-Algebra - **Lowest Common Multiple**

Basic Operations Using Whole Numbers

What is the least common multiple of 70, 60, and 50 ?

F. 60

G. 180

H. 210

J. 2,100

K. 210,000

<p>Press <b>MATH</b> then arrow to the <b>NUM</b> drop-down menu and choose <b>LCM</b>(.</p>	<pre>MATH NUM CPX PRB 1: lcm( 2: gcd( 3: remainder( A: n/d ← Un/d B: F ← D C: Un/d D: n/d</pre>
<p>Type 70,60 and press <b>ENTER</b>.</p>	<pre>lcm(70,60 420</pre>
<p>Arrow up to highlight the LMC(70,60 expression and press <b>ENTER</b> to copy/paste it.</p> <p>Change the values to reflect the answer to the first and the 3rd number, 50.</p>	<pre>lcm(70,60 420 lcm(420,50 2100</pre>

<http://media.actstudent.org/documents/preparing.pdf>

## Intermediate Algebra - Modeling

Find the function given a set of data

As Part of a lesson on motion, students observed a cart rolling at a constant rate along a straight line. As shown in the chart below, they recorded the distance,  $y$  feet, of the cart from a reference point at 1 –second intervals from  $t = 0$  seconds to  $t = 5$  seconds.

$t$	0	1	2	3	4	5
$y$	14	19	24	29	34	39

Which of the following equations represent this data?

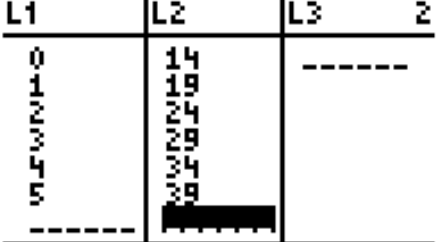

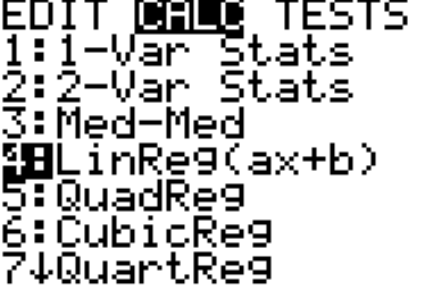

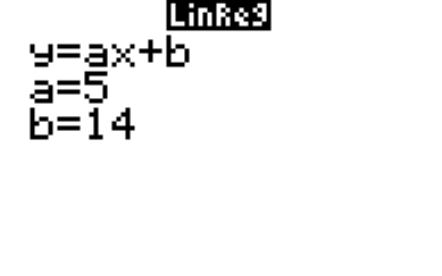

F.  $y = t + 14$

G.  $y = 5t + 9$

H.  $y = 5t + 14$

J.  $y = 14t + 5$

K.  $y = 19t$

<p>Press <b>[STAT]</b>&gt;Edit, then type the data into list L<sub>1</sub> and L<sub>2</sub></p>	
<p>Press <b>[2nd][MODE]</b> to access a calculator screen.</p> <p>Press <b>[STAT]</b> and use your arrow keys to navigate to the <b>CALC</b> drop-down menu. Choose <b>LinReg(ax+b)</b> to perform a linear regression.</p>	
<p>Press <b>[enter]</b> multiple times to calculate the linear regression.</p>	

<http://media.actstudent.org/documents/preparing.pdf>

## Coordinate Geometry - Points

Relations between equations and graphs

The graph of  $y = -5x^2 + 9$  passes through  $(1, 2a)$  in the standard  $(x, y)$  coordinate plane. What is the value of  $a$ ?

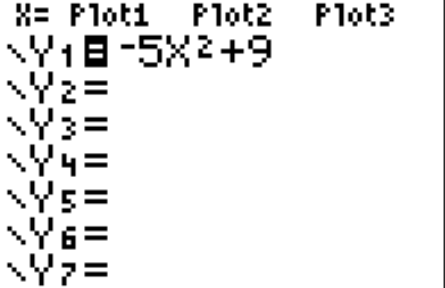

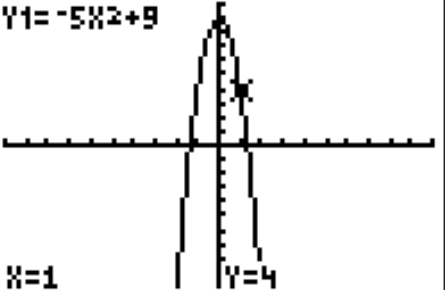

F. 2

G. 4

H. 7

J. -1

K. -8

<p>Press <math>\boxed{Y=}</math> and type the function.</p>	
<p>Press <math>\boxed{\text{TRACE}} \boxed{1} \boxed{\text{ENTER}}</math> to find the <math>y</math>-value when <math>x = 1</math>.</p>	
<p>Solve <math>2a = 4</math></p> <p>(Hopefully, you don't need a calculator for this step).</p>	

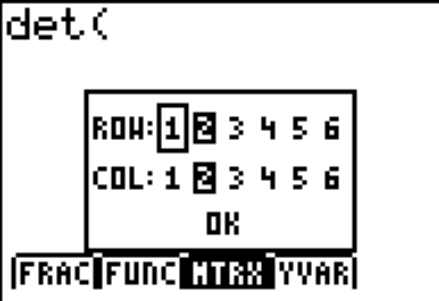

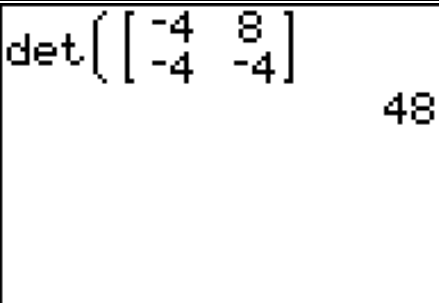

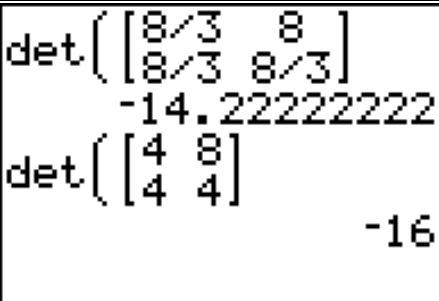

<http://media.actstudent.org/documents/preparing.pdf>

## Intermediate Algebra - Matrices

### Finding the Determinant of a Matrix

The determinant of a matrix  $\begin{bmatrix} a & b \\ c & d \end{bmatrix}$  equals  $ad - cb$ . What must be the value of  $x$  for the matrix  $\begin{bmatrix} x & 8 \\ x & x \end{bmatrix}$  to have a determinant of  $-16$ ?

- A.  $-4$       B.  $-2$       C.  $-\frac{8}{5}$       D.  $\frac{8}{3}$       E.  $4$

<p>Press <math>\boxed{2\text{nd}}\boxed{x^{-1}}</math> and then arrow to the MATH drop-down menu to access the matrix commands. Choose <b>det(</b></p>	
<p>Press <math>\boxed{\text{ALPHA}}\boxed{\text{ZOOM}}</math> and choose a <math>2 \times 2</math> matrix, arrow down to the OK button to confirm.</p>	
<p>Change the values and start substituting the values starting with <math>-4</math>.</p>	
<p>Arrow up to highlight the expression and press <math>\boxed{\text{ENTER}}</math> to copy/paste the expression. Keep changing the values to test each of the answer choices.</p>	

<http://media.actstudent.org/documents/preparing.pdf>

Pre-Algebra - **Greatest Common Factor**

Basic Operations Using Whole Numbers

What is the greatest common factor of 42,126 and 210 ?

F. 2

G. 6

H. 14

J. 21

K. 42

<p>Press <b>MATH</b> and use the arrows to navigate to the <b>NUM</b> drop-down menu. Choose the <b>gcd</b>( command.</p>	<pre>MATH NUM CPX PRB 4↑fPart( 5: int( 6: min( 7: max( 8: lcm( 9: gcd( 0↓remainder(</pre>
<p>Type 42,126 and press <b>ENTER</b>.</p>	<pre>gcd(42, 126 42</pre>
<p>Use the arrow keys to move up and highlight the expression, then press <b>ENTER</b> to copy/paste it.</p> <p>Find the GCD of the value you just calculated and the 3rd number, 210.</p>	<pre>gcd(42, 126 42 gcd(42, 210 42</pre>

[http://www.actstudent.org/sampletest/math/math\\_01.html](http://www.actstudent.org/sampletest/math/math_01.html)

## Intermediate-Algebra - Complex Numbers

Evaluating expressions

12.  $\sqrt{-(-9)^2} = ?$

(Note:  $i = \sqrt{-1}$ )

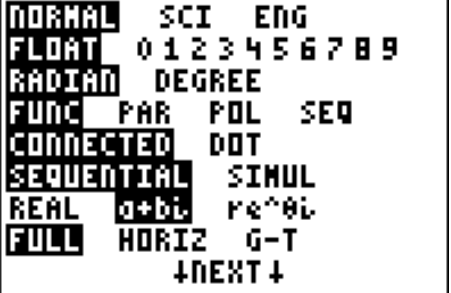

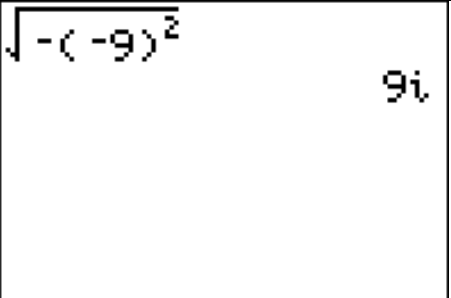

F.  $9i$

G.  $9 + i$

H.  $9 - i$

J.  $9$

K.  $-9$

<p>First, change the mode. Press <b>MODE</b> and change REAL to <math>a + bi</math>.</p> <p>Press <b>2nd</b><b>MODE</b> to access the calculator screen.</p>	 <pre> NORMAL SCI ENG FLOAT 0 1 2 3 4 5 6 7 8 9 RADIAN DEGREE FUNC PAR POL SEQ CONNECTED DOT SEQUENTIAL SIMUL REAL a+bi re^θi FULL HORIZ G-T ↓NEXT↓                     </pre>
<p>Type the expression and press <b>ENTER</b>.</p>	 <pre> √-(-9)²                                 9i                     </pre>

[http://www.actstudent.org/sampletest/math/math\\_02.html](http://www.actstudent.org/sampletest/math/math_02.html)

Pre-Algebra - **Decimals**  
Basic operations with decimals

What is the difference between 1.8 and  $1.\overline{08}$  ?

(Note: A bar indicates a digit pattern that is repeated.)

- A.  $0.7\overline{1}$       B.  $0.\overline{71}$       C.  $0.7\overline{19}$       D.  $0.7\overline{2}$       E.  $0.\overline{72}$

<p>Type 1.0808080808080808080808080808</p> <p>Press <math>\boxed{\text{MATH}}</math>&gt;Frac to convert the decimal to a fraction.</p>	
<p>Subtract the fraction from 1.8</p>	

[http://www.actstudent.org/sampletest/math/math\\_03.html](http://www.actstudent.org/sampletest/math/math_03.html)

## Intermediate-Algebra - Zeros

Finding roots of polynomials

What is the  $x$  -intercept of the graph of  $y = x^2 - 4x + 4$  ?

A. -2

B. -1

C. 0

D. 1

E. 2

<p>Type the function, <math>f1(x) = x^2 - 4x + 4</math> into the entry line and press <b>enter</b> to graph it.</p>	
<p>Press <b>ZOOM</b>&gt;Standard to graph the function.</p> <p>Press <b>2nd</b><b>TRACE</b>&gt;Zero. Move the cursor to the left of the zero and press <b>ENTER</b>, then move the cursor to the right of the zero and press <b>ENTER</b> again.</p>	
<p>Press <b>enter</b> to guess.</p> <p>Note: A graph is an approximate environment, the calculator had trouble identifying the exact value of <math>x = 2</math>, but it was <u>very</u> close.</p>	

[http://www.actstudent.org/sampletest/math/math\\_04.html](http://www.actstudent.org/sampletest/math/math_04.html)

## Intermediate Algebra - Function Composition

Composing functions

If  $h(x) = x^3 + x$  and  $g(x) = 2x + 3$ , then  $g(h(2)) = ?$

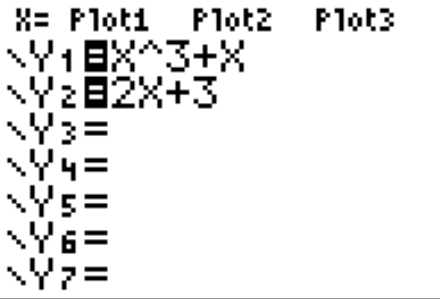

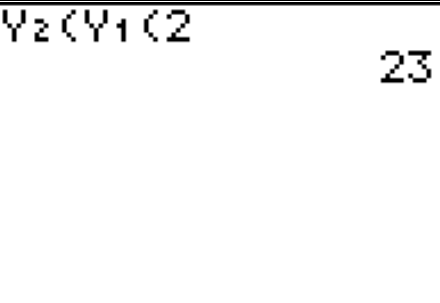

F. 7

G. 10

H. 17

J. 19

K. 23

<p>Type <math>h(x)</math>, then press <b>ctrl</b> <b> </b> <b>:=</b> (this types a :=). Then type the function, <math>x^3 + x</math>. Press <b>enter</b>.</p> <p>Type <math>g(x)</math>, then press <b>ctrl</b> <b> </b> <b>:=</b> (this types a :=). Then type the function, <math>x^3 + x</math>. Press <b>enter</b>.</p>	
<p>Press <b>2nd</b> <b>MODE</b> to access the calculator page.</p> <p>Press <b>VAR</b> <b>&gt;</b> Y-Vars <b>&gt;</b> <math>Y_2</math></p> <p>Press <b>(</b></p>	
<p>Press <b>VAR</b> <b>&gt;</b> Y-Vars <b>&gt;</b> <math>Y_1</math></p> <p>Press <b>(</b>, then type 2 and press <b>ENTER</b>.</p>	

[http://www.actstudent.org/sampletest/math/math\\_04.html](http://www.actstudent.org/sampletest/math/math_04.html)

Pre-Algebra - **Scientific Notation**

Calculations involving scientific notation

A particle travels  $1 \times 10^6$  meters per second in a straight line for  $5 \times 10^{-6}$  seconds. How many meters has it traveled?

A.  $2 \times 10^{11}$

B.  $5 \times 10^{12}$

C.  $5 \times 10^{-12}$

D. 5

E.  $5 \times 10^{-36}$

Type 1, then type <b>2nd</b> , followed by the exponent, 6.  Type 5, then type <b>2nd</b> , followed by the exponent, -6. <b>(Note: <math>1E6 = 1 \times 10^6</math>)</b>	<pre>(1E6)*(5E-6)</pre>
Press <b>enter</b> .	<pre>(1E6)*(5E-6) 5</pre>

[http://www.analyze-math.com/practice\\_tests/act/act\\_sample\\_1.html](http://www.analyze-math.com/practice_tests/act/act_sample_1.html)

## Intermediate Algebra - Roots of Polynomials

Finding roots of polynomials

How many solutions are there to the equation  $x^2 - 7 = 0$  ?

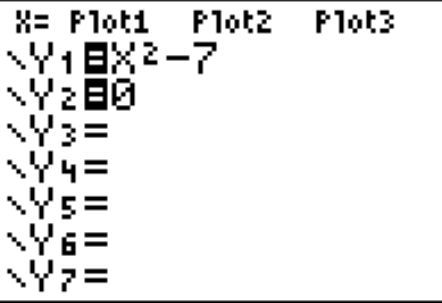

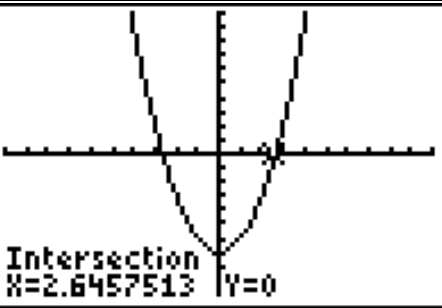

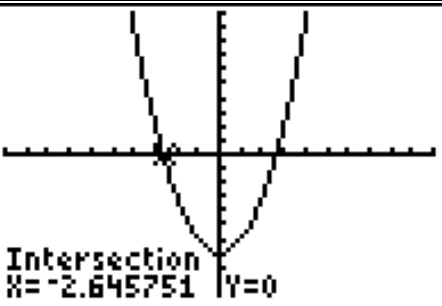

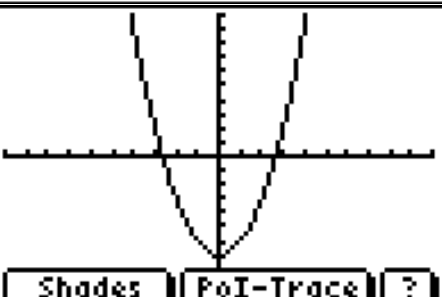

A. 1

B. 2

C. 4

D. 7

E. 14

<p>To find the solutions, graph the quadratic function and locate the zeros on the graph.</p> <p>Begin by pressing <math>\boxed{Y=}</math> and graphing the left &amp; right sides of the equation as two separate functions.</p>	
<p>Press <math>\boxed{ZOOM}</math>&gt;Standard to graph the functions.</p> <p>Press <math>\boxed{2nd}\boxed{TRACE}</math>&gt;Intersection, then press <math>\boxed{ENTER}</math> three times.</p>	
<p>Repeat the process:</p> <p>Press <math>\boxed{2nd}\boxed{TRACE}</math>&gt;Intersection, then press <math>\boxed{ENTER}</math> two times. But, before you press <math>\boxed{ENTER}</math> the 3rd time, move your cursor to the left and the other zero will be recognized.</p>	
<p>Of course, since this question only asked for the number of roots, the original graph would have sufficed (there are two <math>x</math> -intercepts).</p>	

[http://www.anlyzemath.com/practice\\_tests/act/act\\_sample\\_1.html](http://www.anlyzemath.com/practice_tests/act/act_sample_1.html)

## Coordinate Geometry - $f(y)$ Equations

Relationship between points & lines

In the  $xy$  coordinate plane below, which of the following points has coordinates  $(x, y)$  such that  $x = y - 2$  ?

F. A

G. B

H. C

J. D

K. E

<p>Solve the equation for <math>y</math> and type in the <math>\boxed{Y=}</math> screen.</p>	<pre> X= Plot1 Plot2 Plot3 \Y1=X+2 \Y2= \Y3= \Y4= \Y5= \Y6= \Y7=                     </pre>
<p>Press <math>\boxed{\text{ZOOM}}</math>&gt;Standard to graph the function.</p> <p>Press <math>\boxed{\text{TRACE}}</math> and type, 2, then <math>\boxed{\text{ENTER}}</math>.</p>	

<http://www.education.com/reference/article/posttest39/>

## Intermediate Algebra - Logarithms

Evaluating logarithms with base other than 10

Which of the following is a value that satisfies  $\log_6(216) = x$  ?

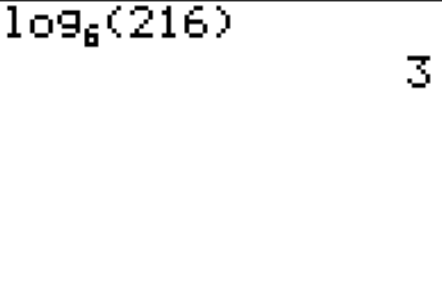

A. 0

B. 1

C. 2

D. 3

E. 4

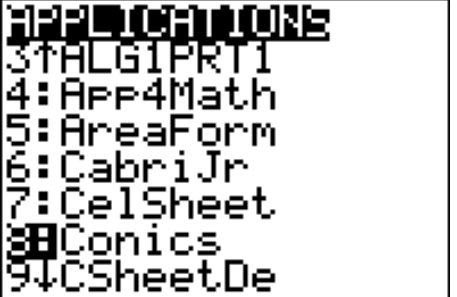

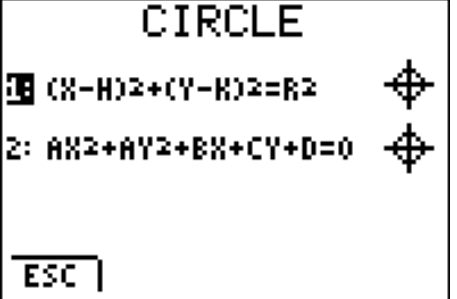

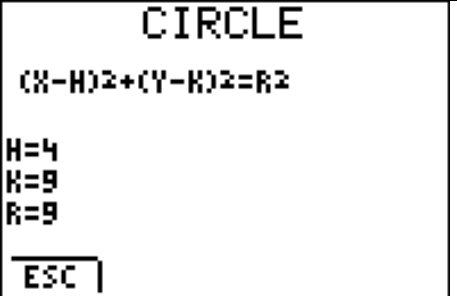

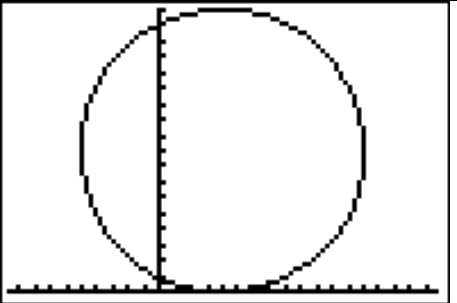

Press <b>ALPHA</b> <b>WINDOW</b> > logBASE(	
Type in the base and the number, then press <b>ENTER</b> .	

<http://www.education.com/reference/article/posttest39/>

**Coordinate Geometry - Circles**  
Relations between equations and graphs

A circle in the standard  $(x, y)$  coordinate plane has center  $(4,9)$  and radius of 9 coordinate units. Which of the following is an equation of the circle?

- A.  $(x - 4)^2 - (y - 3)^2 = 9$                       B.  $(x + 4)^2 + (y + 9)^2 = 9$   
 C.  $(x - 4)^2 - (y - 9)^2 = 81$                       D.  $(x - 4)^2 + (y - 9)^2 = 81$   
 E.  $(x + 4)^2 - (y - 9)^2 = 81$

<p>Press the <b>APPS</b> key and scroll down to the <b>Conics</b> app.</p>	
<p>Choose Circle from the menu and then choose the first choice for the form of the circle.</p> <p>(Hint: Just seeing the formula may be enough to job your memory to solve the problem)</p>	
<p>Change the <math>h, k</math> and <math>r</math> values.</p>	
<p>Note: Choosing a value of 9 for <math>r</math>, means that the formula will be = 81.</p> <p>Since both <math>h</math> and <math>k</math> are being subtracted in the formula, D is the correct answer.</p>	

<http://www.education.com/reference/article/posttest39/>

## Elementary Algebra - Expanding Binomials

Understanding algebraic operations

The expression  $(3x - 4y^2)(3x + 4y^2)$  is equivalent to:

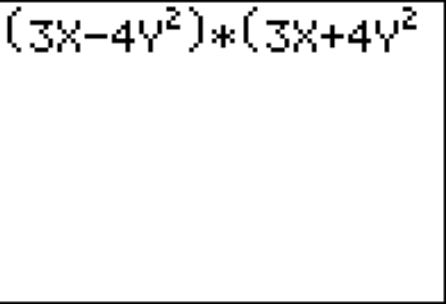

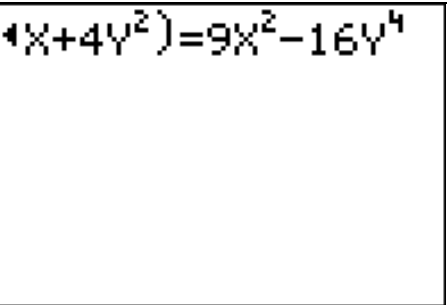

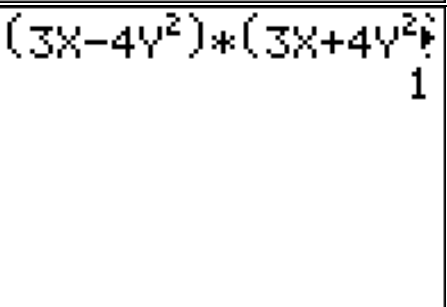

A.  $9x^2 - 16y^4$

B.  $9x^2 - 8y^4$

C.  $9x^2 + 16y^4$

D.  $6x^2 - 16y^4$

E.  $6x^2 - 8y^4$

<p>Type the expression, <math>(3x - 4y^2)(3x + 4y^2)</math> on a calculator screen.</p>	
<p>Press <b>2nd</b><b>MATH</b> and choose the equals sign. Then type the first answer choice on the right side of your equation.</p>	
<p>Press <b>ENTER</b>. The calculator is evaluating whether the statement is true (1) or false (0). Since a 1 displays, the correct answer has been chosen.</p>	

<http://www.education.com/reference/article/posttest39/>

**Pre-Algebra - Exponents**  
Solving equations with exponents

If  $3^x = 54$ , then which of the following must be true?

- A.  $1 < x < 2$                       B.  $2 < x < 3$                       C.  $3 < x < 4$   
 D.  $4 < x < 5$                       E.  $5 < x$

<p>Press the <b>MATH</b> key and scroll down to <b>Solver</b>.</p>	<pre> NUM CPX PRB 6:fMin( 7:fMax( 8:nDeriv( 9:fnInt( 0:summation Σ( A:logBASE( <b>Solver...</b>         </pre>
<p>To solve the equation <math>3^x = 54</math>, you must set it equal to zero first. If you subtract 54 from both sides, you get <math>0 = 3^x - 54</math>. Type this in to the solver.</p>	<pre> EQUATION SOLVER eqn: 0=3^X-54         </pre>
<p>Scroll down and make a 'guess' where it says, X=.</p> <p>A guess can be any number that you think could be the answer. On this problem, you could guess, X= 3.</p>	<pre> 3^X-54=0 X=3 bound=(-1E99, 1...         </pre>
<p>Press <b>ALPHA</b><b>ENTER</b> to solve the equation.</p>	<pre> 3^X-54=0 ▪ X=3.6309297535... bound=(-1E99, 1... ▪ left-rt=0         </pre>

<http://media.act.org/documents/preparing.pdf>

**Pre-Algebra - Absolute Value**  
Evaluating absolute value expressions

$-3|-6 + 8| = ?$

F. -42

G. -6

H. -1

J. 6

K. 42

<p>Start typing the expression, <math>-3</math></p> <p>then press <b>ALPHA</b><b>WINDOW</b> to access the absolute value command.</p>	<p><math>-3</math></p> 
<p>Choose the <b>abs(</b> command.</p>	<p><math>-3 </math></p>
<p>Type, <math>-6 + 8</math> between the absolute value signs. Press <b>ENTER</b> to evaluate the expression.</p>	<p><math>-3 -6+8 </math></p> <p style="text-align: right;"><math>-6</math></p>
<p>Alternatively, you could press <b>2nd</b><b>0</b> to access the absolute value command in the catalog.</p>	<p>CATALOG</p> <ul style="list-style-type: none"> <li>▸ abs(</li> <li>and</li> <li>angle(</li> <li>ANOVA(</li> <li>Ans</li> <li>Archive</li> <li>Asm(</li> </ul>

<http://media.act.org/documents/preparing.pdf>

## Intermediate Algebra - Inequalities

### Solving inequalities

The inequality  $6(x + 2) > 7(x - 5)$  is equivalent to which of the following inequalities?

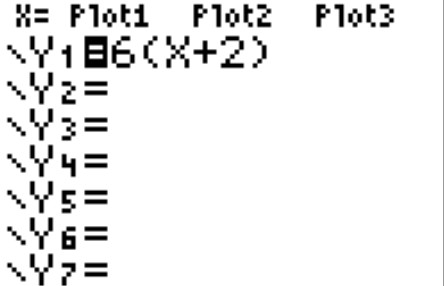

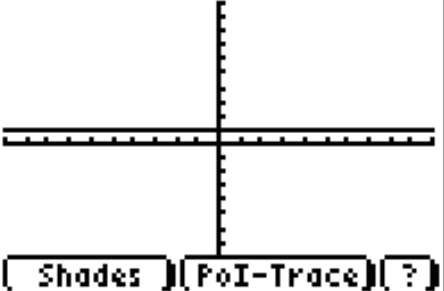

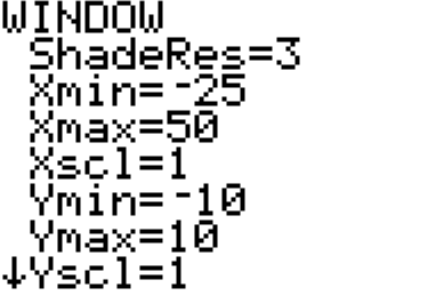

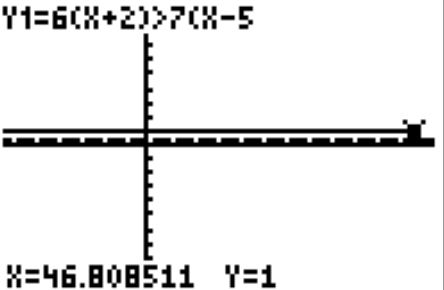

A.  $x < -23$

B.  $x < 7$

C.  $x < 17$

D.  $x < 37$

E.  $x < 47$

<p>Press <math>\boxed{Y=}</math> and start typing the inequality.</p>	
<p>Press <math>\boxed{2nd}\boxed{MATH}</math> and choose the <math>&gt;</math> symbol. Finish typing the expression, <math>7(x - 5)</math>, then press the <math>\boxed{GRAPH}</math> key.</p> <p>Hint: When the inequality is TRUE, a line is graphed at <math>y = 1</math>.</p>	
<p>Since the graph starts/ends outside of the viewing window, change the x-min and x-max.</p> <p>Press <math>\boxed{WINDOW}</math> and change the Xmin=-25 and the Xmax=50</p>	
<p>Press <math>\boxed{TRACE}</math> to find the start of the graph near 47.</p>	

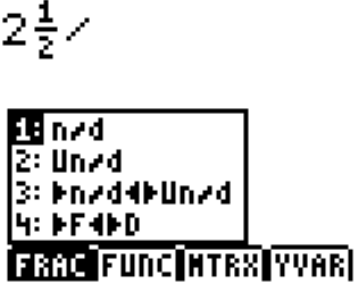

<http://media.act.org/documents/preparing.pdf>

## Pre-Algebra - Mixed Numbers

Evaluating expressions with mixed numbers

The lead of a screw is the distance that the screw advances in a straight line when the screw is turned 1 complete turn. If a screw is  $2\frac{1}{2}$  inches long and has a lead of  $\frac{1}{8}$  inch, how many complete turns would get it all the way into a piece of wood?

- A. 5                      B. 10                      C. 15                      D. 20                      E. 25

<p>Press <b>[ALPHA][Y=]</b> to access the fraction tools.</p> <p>Choose <b>Un/d</b> to access the mixed number template.</p>	
<p>Type in the mixed number, <math>2\frac{1}{2}</math> then press <b>[÷]</b> and access the fraction tools again by pressing <b>[ALPHA][Y=]</b> .</p> <p>Choose <b>n/d</b> to access the fraction template.</p>	
<p>Type the fraction, <math>\frac{1}{8}</math> and press <b>[ENTER]</b> to evaluate the expression.</p>	

[http://www.actstudent.org/sampletest/math/math\\_02.html](http://www.actstudent.org/sampletest/math/math_02.html)

## Intermediate Algebra - Systems

Solving systems of equations

If  $xy = 144$ ,  $x + y = 30$ , and  $x > y$ , what is the value of  $x - y$ ?

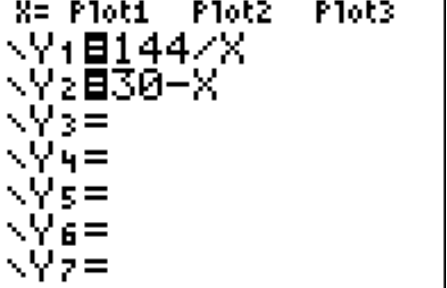

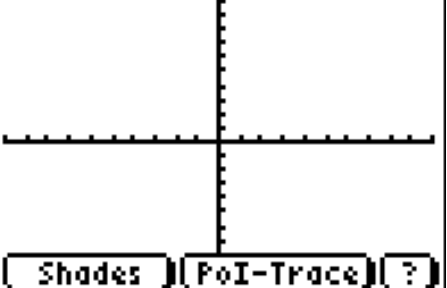

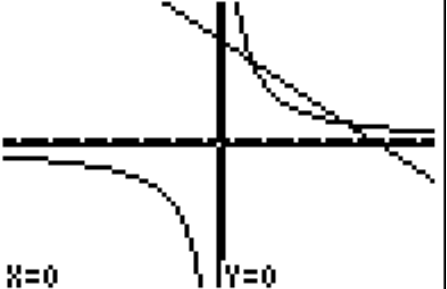

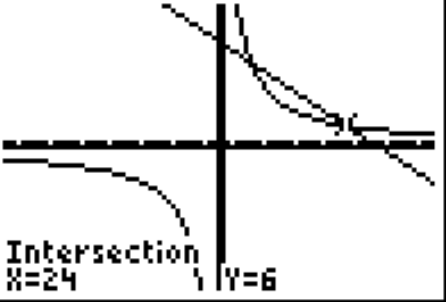

F. 4

G. 6

H. 18

J. 22

K. 24

<p>Solve both equations for <math>y</math>. Press <math>\boxed{Y=}</math> and type the equations.</p>	
<p>Press <math>\boxed{ZOOM}\boxed{6}</math> to graph the functions.  Notice, the graphs are outside the standard viewing window.</p>	
<p>Press <math>\boxed{ZOOM}</math> and choose Zoom Out.  Press <math>\boxed{ENTER}</math> to zoom out until you see the graphs.</p>	
<p>Press <math>\boxed{2nd}\boxed{TRACE}\boxed{5}</math> and move the cursor to choose the first curve (the first function), press <math>\boxed{ENTER}</math>. Then use the cursor to identify the second curve (the second function), and press <math>\boxed{ENTER}</math> again. Finally move the cursor near the intersection point on the right and press <math>\boxed{ENTER}</math>.</p>	

[http://www.actstudent.org/sampletest/math/math\\_02.html](http://www.actstudent.org/sampletest/math/math_02.html)

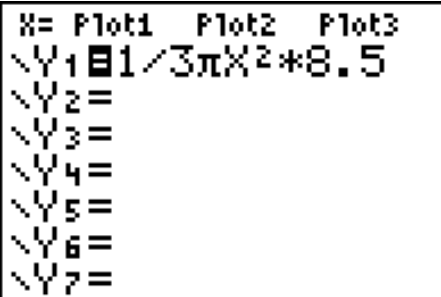

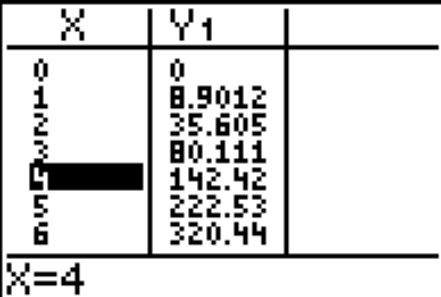

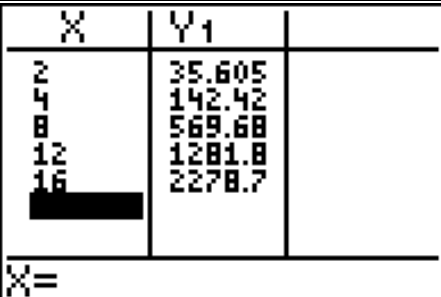

## Elementary Algebra - Substitution

Using tables to substitute values in expressions

The volume,  $V$ , of the right circular cone with radius  $r$  and height  $h$  can be found using the formula  $V = \frac{1}{3}\pi r^2 h$ .

A cone-shaped paper cup has a volume of 142 cubic centimeters and a height of 8.5 centimeters. What is the radius, to the nearest centimeter, of the paper cup?

- A. 2                      B. 4                      C. 8                      D. 12                      E. 16

<p>Type the right-side of the equation. Make sure to substitute 8.5 for <math>h</math> and use the <math>[X,T,Θ,n]</math> key instead of <math>r</math>.</p>	
<p>Press <math>[2nd][GRAPH]</math> to access the table.</p> <p>You should be able to identify the solution.</p>	
<p>Alternatively, press <math>[2nd][WINDOW]</math> and change the Indpnt to Ask.</p>	
<p>By typing values for <math>x</math> and pressing <math>[ENTER]</math>, you can substitute multiple values for <math>x</math>.</p>

## Trigonometry - Trig Identities

Evaluating trigonometric expressions

Which of the following is equivalent to  $\sin(\theta) \cdot \csc(\theta)$  is defined?

- F.  $-1$       G.  $1$       H.  $-\tan(\theta)$       J.  $\tan(\theta)$       K.  $-\sin^2(\theta)$

<p>Press the <b>MODE</b> key and change the setting to DEGREE mode.</p>	 <pre> NORMAL SCI ENG FLOAT 0 1 2 3 4 5 6 7 8 9 RADIAN DEGREE FUNC PAR POL SEQ CONNECTED DOT SEQUENTIAL SIMUL REAL a+bi re^θi FULL HORIZ G-T ↓NEXT↓                     </pre>
<p>Choose an angle in the first quadrant...like <i>30 degrees</i></p> <p>Substitute this value into the expression. Press <b>ENTER</b> to evaluate the expression</p>	 <pre> sin(30)*1/sin(-30)                     -1                     </pre>
