

Solve each quadratic inequality algebraically, then graph the solution on a number line.

1. $x^2 - 7x - 18 < 0$

2. $x^2 + 2x \geq 15$

3. $5x^2 + 6 \leq 13x$

Graph each quadratic inequality, using a solid or dashed boundary line and shading the half-plane of the inequality.

4. $y \leq x^2 - 2x - 8$

Vertex _____

x-intercepts _____

y-intercept _____

5. $y > -x^2 - 4x - 3$

Vertex _____

x-intercepts _____

y-intercept _____

6. $y < x^2 + 4x - 5$

Vertex _____

x-intercepts _____

y-intercept _____
