## Algebra 1 Fall 1998 Final Examination

Answer the following questions in a separate space. Make sure you show all work and give full and complete responses, using the numbering system I have established for the problems. There is a 90 -minute time limit on this examination. Use your calculator and the computer as you need. Do Not write on this Examination!

1. On this examination use Word, Excel, Graphical Analysis, Graph Link, or Pmail at least once in your solution to a problem. Report as the answer to this question what problem(s) were involved and what technologies were used.
2. Write the equation of the line that moves through the point $(-6,2)$ and has a slope of 2 .
3. Measure the height of this room in centimeters.
4. Zer made the following scores on her Portfolios this semester. Give her grades for each 9 weeks and what she needs to make on this Final Examination to get a " B " in Algebra?

| Item | $1^{\text {st }} 9$ weeks | $2^{\text {nd }} 9$ weeks |
| :--- | :--- | :--- |
| OverArching | 3 | 3 |
| 7 Parts of Alg | 2 | 4 |
| Testing | 1 | 3 |
| Technology | 3 | 2 |
| Growth | 4 | 3 |
| Free | 0 | 3 |
| Journal | 3 | 4 |
|  |  | 1day late |

5. Get the two lists ${ }_{\mathbf{L}} \mathbf{X S}$, and ${ }_{\mathbf{L}} \mathbf{Y S}$ (or $\mathbf{L}_{\mathbf{1}}$ and $\mathbf{L}_{\mathbf{2}}$ ), and your assigned number from Mr. Young and. Report your number as the answer to this question.
6. Answer the following for the list ${ }_{\mathrm{L}} \mathbf{X S}$ :
a) identify the values listed in the table below

| $n$ | Min | max | median | mode | mean | Average |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

b) make a Histogram or a Box and Whiskers graph
c) calculate the percent error on the mean if it should be 3888.5
7. Using both list from question 5, answer the following:
a) produce a Scatter Plot of the data, using ${ }_{L} \mathbf{X S}$ as the $x$-values
b) state the pattern you see in this data set
c) produce a model (regression equation) that fits this data
d) give a graph of this equation with the Scatter plot
e) use this model to predict the value of $y$, if $x$ is given as 77777
8. Give the slope and y-intercept of the following equations:
a) $y=2 x-4$
b) $2 y=5 x+3$
c) $y-5=-3(3 x-5)$
9. Solve the following. Use two of the four methods (Old Way, Graph, Table, and Solver). Use only one method per problem and state the method you are using.
a) $8-9 T=21 T-17$
b) $-2(x-5)=-x$
c) $9(b-4)=5(3 b-2)$
10. Using the rule

$$
y=\frac{1}{3} x-22
$$

a) create a table of 7 values pairs for $x$ and $y$
b) graph these values
c) put the values from the table into lists on your calculator
