

What's new in TI-Nspire v1.3?

January, 2008

GnG

Polar Graphing
Trace – can set step size (perhaps to match a table)
Geometry – labeling while hovering over objects;
[tab] between objects that are close

L&S

Bottom line becomes editor
Max/Min col. width

D&S

Set Histogram bin width and alignment
Shading under a curve
Multiple scatter plots on one D&S graph
Normal Probability plot

Calculator

Increased list length (still limited to 2500 in L&S) to capacity of RAM
Changes to summation and series functions, added functions (DominantTerm)
Programming
Editor (a new App, but not on the list of Applications)
Libraries

General

Menu improvements – the 'wrench' is only Tools menu, centered on screen;
other 'tools menus' become 'Actions'
Press-to-Test/TestGuard

Computer Software has new navigation buttons on the toolbar and
a 'Refresh Libraries' button
